### Frequently asked problems and matters needing attention

1. What is the camera prompt error when inserting the memory card? How to solve it?

Try to format the memory card first, if not, or prompt after formatting. This is caused by the memory card error, please replace a new class6 or more memory card in this camera.

- If the camera is not used for a long time, remove the camera battery and place it in a dust-free, dry environment and a temperature no higher than 30°C.
- To extend the battery life, please complete the discharge before storage.

Please fully charge the battery at least once every 3 months.

- If the lens or display has dust or dirt, gently wipe it with a clean, soft lens cleaning cloth.
- Since this machine is a precision instrument, so do not make it fall or suffer strong impact or vibration.
